

ENOC MULUMEODERHWA DON BENI

FULL-STACK DEVELOPER • DEVOPS ENGINEER • CYBERSECURITY SPECIALIST

Kinshasa, DRC / Bujumbura, Burundi • contact@benenoc.com • benenoc.com • github.com/enocben

PROFESSIONAL SUMMARY

Versatile Full-Stack & DevOps Engineer with over 7 years of independent software development experience and a proven track record of delivering 6 production-grade client applications since 2023. Expert in architecting secure REST APIs, building cross-platform web and mobile solutions, and managing containerized Linux cloud infrastructure (Docker, VPS, DNS). Currently completing a degree in Cybersecurity, integrating secure coding practices, penetration testing, and server hardening into every stage of the software development lifecycle.

PROFESSIONAL EXPERIENCE

Independent Full-Stack Developer & DevOps Consultant — 2023 – Present

Freelance / Client Projects • Kinshasa, DRC & Remote

- End-to-End Delivery: Successfully engineered and deployed 6 commercial software solutions for local enterprises, spanning pharmacy management, multi-warehouse inventory, and financial systems.
- Backend & API Architecture: Designed high-performance RESTful APIs and database schemas utilizing TypeScript (NestJS, AdonisJS) and Python (FastAPI, Flask) with optimized SQL queries.
- Infrastructure & DevOps: Configured, hardened, and maintained production Linux VPS environments using Docker containers, automated backups, reverse proxies (Nginx), and custom DNS/domain routing.
- Security & Hardening: Conducted security assessments, vulnerability checks, and input sanitization to safeguard application endpoints and customer sensitive data against common web threats.

SELECTED COMMERCIAL PROJECTS

Pharmacy Management & Inventory Platform — Web & Mobile

Tech Stack: TypeScript, NestJS, Flutter, PostgreSQL, Docker

Architected an integrated web portal and mobile app to streamline medicine entry/exit tracking, stock alert thresholds, and daily sales operations, reducing inventory variances for local pharmacies.

Multi-Warehouse Inventory & Accounting System — Web Application

Tech Stack: React, AdonisJS, MySQL, Redis

Engineered a centralized business management platform combining real-time stock flow auditing with automated ledger and invoice accounting workflows.

Internal Banking Operational Software — Desktop & Web

Tech Stack: Python, FastAPI, React, PostgreSQL, Linux/Docker

Developed secure, low-latency internal software for banking transaction logging, user role management, and audit trailing with strict data access controls.

TECHNICAL EXPERTISE

Languages:	TypeScript, JavaScript, Python, Dart
Backend:	NestJS, AdonisJS, FastAPI, Express, REST APIs
Frontend/Mobile:	React, Astro, Flutter, HTML5/CSS3
Databases:	PostgreSQL, MySQL, Redis
DevOps & Cloud:	Linux (Debian/Ubuntu), Docker, VPS, Nginx, DNS
Cybersecurity:	Web & Network Security, Penetration Testing, Hardening
Tools & Workflow:	Git, GitHub, ADB, CI/CD basics

EDUCATION

Bachelor's Degree in Cybersecurity

University of the Great Lakes (UGL) — 2023 – Expected Dec. 2026

State Diploma in Industrial Electricity

Secondary Technical Education | 2018 – 2022
